ALBANIA MARINA DEVELOPMENT SUCCESS FOR MARINA PROJECTS

1 December 2023

SUCCESS FOR MARINA JOINT VENTURE

Marina Projects Ltd is pleased to announce its involvement in the successful bid for a government-led marina and waterfront development scheme in the coastal city of Vlorë, Albania. Marina Projects tendered for the marina development rights as part of a Joint Venture alongside local companies Marina di Vlorë, Brunes and Ndrejoni, with Marina Projects providing marina design, technical and financial advice for the bid.

The successful JV is responsible for the design, operation, maintenance and transfer of the marina facility over a 35-year period, after which the marina will be transferred to the contracting authority, the Albanian Ministry for Industry & Energy. Project investment is estimated at 2.8 bn Albanian Lek (€23.1m) and includes major marine civil infrastructure such as construction of breakwaters and fixed jetties.

Upon completion, Marina Vlorë will provide upward of 400 marina berths, including infrastructure to accommodate the ever-growing fleet of marine tourism vessels in the city which visit nearby marine protected areas (MPA's) such as historic Sazan Island and untouched Karaburun peninsula, which separates the Adriatic and Ionian seas.
